

Best Out of Waste: Turning Waste into Wonder

Kalpa School • September 10, 2026

Kalpa School's "Best Out of Waste" activity encouraged students to turn discarded materials into creative, useful products. Pre-Primary children designed colourful organisers using compartmentalised boxes, Primary students crafted attractive pen stands from waste materials, and High School students enthusiastically created a range of beautiful, functional articles from recycled items.

The activity fostered creativity and environmental responsibility among students, truly embodying the spirit of "Waste not, want not!"
